COMPETITION VIDEOS

With so much amazing footage from the robotics season so far, our team management, public relations, and business students have been working diligently to keep our team supporters updated on our progress. Juju Poliard and Norah Smucker helped lead the charge by taking professional videos and photos throughout both competitions. We then edited these videos and photos into videos that are posted on our team YouTube channel and shared with our school via the announcements. We will continue this in the future in our effort to increase awareness of our amazing program and STEM at American Heritage. Also, it is fun to showcase all of our incredible work and success to our community. Check them out today!

OFFSEASON COMPETITIONS

Our team competed in two FRC competitions in October. The first competition was Raiders' Revenge at Gulliver Prep in Pinecrest, FL. on October 18th. We fielded two robots at this competition – our robot that was used for all competitions during spring of this year and a new robot created this summer. We had a lot of success with both teams at the competition, which featured 14 robots in total. In playoffs, both Stallion Robotics robots were paired together, along with a robot made by the Dirty Mechanics, a team from Boca Raton. Our alliance made it all the way to the finals, which was extremely exciting! It gave us a lot of confidence moving into the next competition, Pirate's Pillage, on October 18th in Homestead, FL. At this competition, which featured 22 total teams, our on-season bot was paired in playoffs with team 59 RamTech from Miami, and our off-season bot was paired with team 108 SigmaC@t from Fort Lauderdale. Both alliances made it to semifinals after very successful days as a whole.

THANK YOU SO MUCH TO OUR SPONSORS!

AMERICAN HERITAGE SCHOOLS, LEXISNEXIS, HPCC SYSTEMS, TALENTNET, CONCURRENT REAL-TIME, OTIS, THE SCHWARTZ GROUP, AND BOTFITTERS.

FTC SCRIMMAGE

On October 11th, we went to the FTC Scrimmage at Boca Raton High School. This competition was purely for practice to help the teams in our league acclimate to the competition environment. In total, only a few matches were played, but three of our four FTC teams were able to get onto the field for at least one practice match. This was extremely beneficial to our students, as we now know what to expect when going to competitions. The atmosphere, queuing process, inspection process, and scheduling process can all be very difficult to deal with for new students. Now, we are well-prepared to succeed at the League Meet #1 on November 1st. This competition is one of three league meets prior to the league championship, where teams can qualify for the State championship.

PIN FUNDRAISER

In order to help support the Boca Raton Police Athletic League, we are running a pin fundraiser on campus. After getting permission from 15 teachers across our middle and high schools, we designed pins for each one with sayings they frequently use. Students are able to purchase these pins, and all proceeds help support the Police Athletic League. We manufacture all the pins in our laboratory using special machinery. To incentivize teachers, the teacher whose pin sells the most will receive a 3D printed trophy and a \$100 Publix gift card. We are super excited about the launch of this fundraiser and we hope we can help support those in need!

THANK YOU SO MUCH TO OUR AMAZING PARENTS AND VOLUNTEERS!
